AMENDMENT

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (currently amended) A method for receiving performance information over a network for generating a pseudo-live performance, the method comprising:

detecting a need for the performance information, ~~wherein the step of detecting a need for performance information comprises one or more of:~~ by determining a time of a previous ~~previously~~ information reception event, detecting a status of a storage device, and accessing a profile;

selecting a process for obtaining the needed performance information;

executing the process for obtaining the needed performance information; and

generating the pseudo-live performance by mixing information corresponding to one or more portions of the needed performance information with other information.

2. (cancelled)

3. (Previously presented) The method of claim 1, wherein the profile indicates one or more of:

a type of information desired by an end-user;

a schedule of an end-user; and

scheduled times at which information is transmitted by a performance transmitter.

4. (Original) The method of claim 1, wherein the selecting a process comprises determining whether a performance transmitter can receive an information request.

5. (Original) The method of claim 4, wherein the determining whether a performance transmitter can receive an information request comprises one or more of:

Application/Control Number: 09/775,585
Art Unit: 2141

Docket No.: 1999-0735CIP

transmitting a query signal to the performance transmitter;
passively receiving a signal from the performance transmitter; and
accessing a profile.

6. (Original) The method of claim 4, further comprising:

generating an information request; and
transmitting the request to the performance transmitter via the network.

7. (Original) The method of claim 1, wherein the selecting a process comprises determining
an appropriate time to receive information from a performance transmitter.

8. (Cancelled)

9. (Previously presented) The method of claim 1, wherein the step of generating the pseudo-
live performance comprises:

retrieving the other information;
decoding one or more commands of the other information; and
performing one or more tasks instructed by the commands.

10. (Original) The method of claim 9, wherein the one or more commands includes one or
more of programming commands that execute a software program, housekeeping commands
that load, delete, change or overlay stored information, and performance commands that
reproduce stored information from one or more specified locations of a storage device.

11 - 13. (Cancelled)

Application/Control Number: 09/775,585
Art Unit: 2141

Docket No.: 1999-0735CIP

14. (currently amended) A pseudo-live performance generator, comprising a controller that:
detects a need for performance information by ~~one or more of:~~ determining a time of a previous information reception event, detecting a status of a storage device, and accessing a profile;

selects a process for obtaining the needed performance information;

executes the process; and

generates the pseudo-live performance by mixing information corresponding to one or more portions of the needed performance information with other information.

15. (Cancelled)

16. (currently amended) The pseudo-live performance generator of claim 14 ~~15~~, wherein the profile indicates one or more of:

a type of information desired by an end-user;

a schedule of an end-user; and

scheduled times at which information is transmitted by a performance transmitter.

17. (Original) The pseudo-live performance generator of claim 14, wherein the controller determines whether a performance transmitter can receive an information request.

18. (Original) The pseudo-live performance generator of claim 17, wherein the controller performs one or more of:

transmitting a query signal to the performance transmitter;

passively receiving a signal from the performance transmitter; and accessing a profile.

19. (Original) The pseudo-live performance generator of claim 17, further comprising:

Application/Control Number: 09/775,585
Art Unit: 2141

Docket No.: 1999-0735CIP

a request generator that generates an information request, wherein the controller transmits the request to the performance transmitter via the network.

20. (Original) The pseudo-live performance generator of claim 14, wherein the controller determines an appropriate time to receive information from a performance transmitter.

21. (Cancelled).

22. (currently amended) The pseudo-live performance generator of claim 14 ~~21~~, wherein the controller:

- retrieves the other information;
- decodes one or more commands of the other information; and
- performs one or more tasks instructed by the commands.

23. (Original) The pseudo-live performance generator of claim 22, wherein the one or more commands includes one or more of programming commands that execute a software program, housekeeping commands that load, delete, change or overlay stored information, and performance commands that reproduce stored information from one or more specified locations of a storage device.

24. (Cancelled)
